Siddharth Singh

Kanpur, Uttar Pradesh

300+ DSA problems

+91-8354878525 | sid.webd.singh.04@gmail.com | Linkedin | Github | Portfolio

Education

Woodbine Gardenia School - CBSE **2019-2020**
X — Percentage: 75% *Kanpur, Uttar Pradesh*

Woodbine Gardenia School - CBSE **2021-2022**
XII — Percentage: 70% *Kanpur, Uttar Pradesh*

Sikkim Manipal Institute of Technology **2022 – 2026**
B.Tech in Computer Science and Engineering — CGPA: 6.9 *Majitar, Sikkim*

Technical Skills & Certifications

Languages: JavaScript, Java, Python, SQL, TypeScript
Frontend: ReactJS, Redux, React Router, Tailwind CSS, Material UI
Backend: Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture
Databases: MongoDB, MySQL
Tools/Platforms: Git, GitHub, VS Code, Postman, Linux, GitHub Actions (CI/CD), Vercel
Machine Learning/AI: Scikit-learn, TensorFlow, Flask Model Deployment
Core Subjects: DSA, OS, DBMS, CN, ML, COA, SE, Compiler Design
Key Certifications: Artificial Intelligence (IIT Kanpur), Data Analytics (NPTEL), Generative AI (Microsoft), ChatGPT Prompt Engineering (DeepLearning.AI)
Additional Certifications (Grouped): Ethical Hacking (IIT Kanpur), Deloitte Data Analytics Simulation, Microsoft Azure AI — Available on LinkedIn

Experience

Academy of Skill Development **Jun 2024 – Jul 2024**
Data Analyst Intern *Kolkata, India*

- Built and evaluated machine learning models using Python and Scikit-learn.
- Performed testing, tuning, and validation to ensure reliable model performance.
- Optimized workflows, achieving a 20% reduction in computational resource usage.

Tatva AI **May 2025 - July 2025**
Software Developer Intern *Remote*

- Built RESTful APIs using Flask for seamless backend integration.
- Integrated Python-based ML models into production workflows to automate predictions.
- Improved debugging and monitoring by implementing advanced logging using Loguru.

SimDaas Autonomy Pvt Ltd **Jan 2026 - Jul 2026**
Adas Scenario Intern *Kanpur, India*

- Designed and implemented Junction collision scenarios using OpenSCENARIO 2 (OSC2), enabling accurate detection of crossing-traffic risks and evaluation of Autonomous Emergency Braking (AEB) performance.
- Developed Reverse driving scenarios to simulate rear-obstacle detection and safe stopping behavior, improving system reliability in low-speed and parking environments

Projects

DIABETES PREDICTION MODEL — Python, Pandas, Numpy, Scikit-learn, Matplotlib, Decision Tree, Random Forest, SVM

– Developed ML model on Pima Indians dataset to predict diabetes risk; evaluated via accuracy and confusion matrix.

TITANIC SURVIVAL PREDICTION — Python, Numpy, Scikit-learn, Feature Engineering, Logistic Regression, Decision Tree, Random Forest, Support Vector Machine, K-Nearest Neighbors

– Predicted passenger survival using Kaggle Titanic dataset with full ML pipeline (EDA, preprocessing, feature engineering).

– Optimized Random Forest model achieved **85% accuracy** using precision, recall, and F1-score metrics.
